If you have a respiratory condition, please contact your physician prior to use.

FCC Statement

Potential for Radio/Television interference

This device complies with Part 18 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 18 of the FCC rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. The product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that the interference will not occur in a particular installation. If the product does cause harmful interference to radio or television reception, which can be determined by turning the product on or off, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the product and the receiver.
• Connect the product into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help
• Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
When using electrical appliances, basic safety precautions should always be taken including the following:

- This product is for household use only; **DO NOT** use outdoors.
- **WARNING:** **NEVER** operate in the presence of explosive or flammable gases.
- Operate diffuser only when fully assembled.
- Close supervision is necessary when any appliance is used near children.
- Always use on an elevated firm, level surface where it is not easily knocked over.
- **WARNING:** **DO NOT** place the appliance directly on the floor, near computers or sensitive electronic equipment.
- Only use Power Adaptor and accessories provided by the manufacturer for this product.
- Before use, extend the cord and inspect for any signs of damage.
- **WARNING:** **DO NOT** use if cord has been damaged.
- Keep cord away from heated surfaces and arrange cord away from traffic areas and where it will not be tripped on.
- **WARNING:** **DO NOT** block any air outlets or intakes.
- **WARNING:** **NEVER** use the diffuser after a malfunction, after it has been dropped or damaged in any way.
- **WARNING:** **DO NOT** operate if Water Reservoir is empty.
- Always fill Water Reservoir with water before adding essential oils. Only fill the Water Reservoir to the suggested capacity (100ml); do not use hot water in the unit.
- Empty Water Reservoir when not in use.
- Unplug diffuser when not in use, when moving location, or before cleaning.
- **WARNING:** **ALWAYS** unplug the Power Adaptor by grasping the adaptor itself; never pull on cord. Ensure that hands are dry.
- **WARNING:** To protect against electrical shock, **DO NOT** immerse unit, plug or cord in water or spray with liquids and plug the appliance directly into a 120V AC electrical outlet.
- Always unplug and empty the Water Reservoir when not in use for a long period of time.
- Clean the Water Reservoir every week and perform regular maintenance of the Ultrasonic Nebulizer. **WARNING:** **NEVER** scrape the Ultrasonic Nebulizer with a hard or sharp object.

Remote Control Battery Disposal:

**WARNING:** **DO NOT** dispose of batteries in fire. Improper handling/disposal of batteries may cause batteries to explode or leak. Please dispose of batteries responsibly by throwing away batteries in a proper trash receptacle per township ordinance.
How It Works

Thank you for choosing RevitaSpa™ Ultrasonic Aromatherapy Diffuser & Flameless Candle with Remote. This product comes with a 1-YEAR WARRANTY, as your satisfaction is our primary concern.

RevitaSpa™ Ultrasonic Aromatherapy Diffuser & Flameless Candle with Remote uses Ultrasonic Technology to create humidity instantaneously, working silently to erase the discomforts of dry air. The addition of RevitaSpa™ Fragrance Oil fills your space with a soothing, aromatic fragrance and soft LED lights mimic the flicker of candlelight.

Unpacking

1. Unbox the product.
2. Remove the protective wrap.
3. Open the packaging to reveal the diffuser.
4. Unwind the power cord.
5. Remove the fragrance oil packet.

Filling & Operating Instructions

⚠️ WARNING: Always unplug the unit before filling. ⚠️ WARNING: DO NOT touch the water in the Water Reservoir.

Filling the Aromatherapy Diffuser

1. Place the unit on a flat, level surface.
2. Place Diffuser inside of the Decorative Metal Base and align so that the ON/OFF button is accessible from the opening in the bottom of the Base.
3. Remove the Diffuser Lid and fill the Water Reservoir with 100ml of cool water (as indicated by fill line); Do Not allow water into Air Outlet as this could damage unit. Do Not exceed the maximum fill line indicated. Add 1-2 drops of Fragrance Oil to start. If a stronger scent is desired, add up to 4 drops of Fragrance Oil per 100ml of water.
4. Replace Diffuser Lid and place the Frosted Glass Insert around the Diffuser, inside the Metal Base.

⚠️ WARNING: When there is not enough water in the unit, it will automatically turn off. In this instance, unplug the diffuser and re-fill the Water Reservoir.

Operating the Aromatherapy Diffuser

1. Insert the Power Adaptor into the unit
2. Plug the unit into a standard (120V AC electrical outlet).
Using the Remote Control

All functions are accessible using the Remote Control

1. **Power** - Pressing the Power Button once will turn the unit on, starting the mist and light function. Pressing the button a second time will turn the unit off.

2. **Light** - The light function allows you to have a steady glow (default), a flickering candlelight effect, or no light at all. The light function can be used without the mist by pressing the Light Button when the unit is off. Pressing the Light Button once will change the steady glow to a flickering, candlelight effect. Pressing the button twice will turn the light off.

3. **Brightness/Dim** - Pressing the Brightness Button once will dim the light; pressing the button a second time will bring the light back to full brightness.

4. **Mist Mode/Intermittent Mist** - Pressing the Mist Mode Button once will change the steady, continuous mist to intermittent – the diffuser will mist for 15 seconds, turn off for 15 seconds and repeat. Pressing the button a second time will resume the steady, continuous mist.

Using the Manual Mode
(Power - ON/OFF button)

The ON/OFF Button on the bottom of the Diffuser (figure 1) allows you to operate the power and intermittent function without the use of the Remote Control.

1. Ensure that the power symbol on the Diffuser (figure 2) aligns with the power symbol on the Decorative Metal Base (figure 3). The ON/OFF button will be accessible through a cut out in the Base (figure 4).

2. To avoid spilling water in the Reservoir, lift the diffuser straight up (DO NOT tilt) to access the ON/OFF button (figure 5).

3. Press the button once and the mist will run continuously. Press the button twice and the unit will be in intermittent mode—it will mist for 15 seconds and turn off for 15 seconds. Pressing the button a third time will turn the unit off.
Weekly Cleaning & Care

⚠️ WARNING: Before cleaning always turn power OFF and unplug the unit.

Surface Cleaning

Gently wipe with a soft damp cloth and a mild detergent; Do Not use any solvents or aggressive cleaning agents.

⚠️ WARNING: NEVER scrape the Ultrasonic Nebulizer with a hard or sharp object.

⚠️ WARNING: When emptying the water from the Water Reservoir, make sure that the water is poured away from the Air Outlet. If water is poured into the outlet it may damage the diffuser.

White Dust Cleaning

If mineral deposits “White Dust” are evident around the Ultrasonic Nebulizer and Water Sensor, clean these surfaces with a soft cloth and a small amount of undiluted white vinegar. If necessary, mix a solution of 50% white vinegar and 50% water and fill the Water Reservoir with enough solution to cover the Ultrasonic Nebulizer. Allow it to soak for an hour and then use a cotton swab to gently loosen buildup. Rinse Reservoir with water and wipe with a soft cloth.
Storage

1. Follow all cleaning instructions prior to storage.
2. Dry all parts, including the inside of the Reservoir. **WARNING: NEVER** leave water inside the Water Reservoir for several days.
3. Preferably store in its original box, in a dry place away from high temperatures.
5. Follow all cleaning instructions after long periods of storage.

About White Dust

Use of high-mineral content water may cause a white mineral residue to accumulate on room surfaces near the aroma diffuser. The mineral residue is commonly referred to as “White Dust”. The higher the mineral content (the harder your water is), the greater the potential for White Dust. The White Dust is not caused by a defect in the aroma diffuser, but is due only to minerals suspended in the water from your tap. **WARNING**: If you have hard tap water STOP using tap water and use **ONLY** filtered, distilled, cold boiled or bottled water to minimize the White Dust residue.
